FOCCUS

► Foccus is seen to be the most successful High-End Compact Do-it-yourself-speaker in recent years. The only moderate sized Foccus renders an optimum of dynamic bass and music quality in total.

Since its introduction Foccus has proven in many comparing tests that it does not require voluminous crates to deliver impressive and realistic music reproduction

The front firing reflex opening allows to place Foccus on bookshelves. Should occasionally the bass response be boosted too much, this can be regulated by adding of a damping pad to the reflex pipe. Some owners of big systems have employed Foccus in their smaller room with great pleasure.
