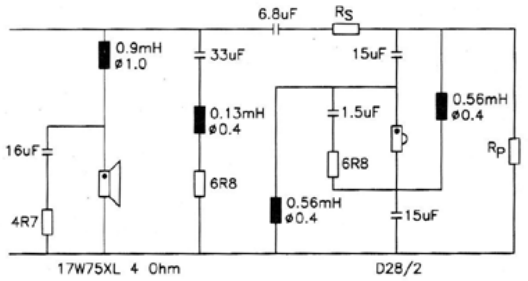
6 dB crossover design is technically the best conclusion looking to the phase and impulse behaviour of a speaker system. In most constructions found the unregular frequency and phase behaviour of the drivers do not allow for this kind of design.

Dynaudio drivers generally have a controlled frequency and phase response so that a 6 dB crossover delivers ideal results.



The Kit.

2	Tweeter D 28/2
2	Woofer 17 W-75 XL, 4 Ohms
2	Mounting gaskets 17 W-75
2	Bass reflex pipes Ø 50 x 147 mm
2	Connection terminals
2	FOCCUS crossovers
2	Damping bitumen pads 125 x 195 mm
2	Damping foam 210 x 290 mm
2	Damping foam 100 x 210 mm
2	Damping foam 160 x 210 mm
2	Damping foam 210 x 260 mm
2	Damping foam 105 x 290 mm
1	Damping wadding piece Q 50 g
1	Sealing glue LX-2
36	Self tapping screws 3.5 x 20 mm
1	1.8 m cable, dia 2.5 mm^2
2	DYNAUDIO badges
1	Blue print

All specification subject to change without notice.

The Product.

► Foccus is a speaker system for music lovers looking for perfect reproduction with limited space demands. Classic as well as pop music reproduction are delivered with equal high standard.

For an aesthetical as well as technical placement in your living room we recommend using the Dynaudio Master pedestal.
